Dr. Jim

Every bike, like every rider, is unique. Let the experts at CycleVisions® maximize your specific bike's performance. We offer a variety of packages designed specifically to improve power, performance, and fuel economy, off the line and on the road. Precision ported heads and computer dyno tunes bookend a host of efficiency-enhancing services guaranteed to make your bike perform better. And since quality and obsessive attention to detail are synonymous with all CycleVisions® products, rest assured your bike will be well cared for—by bikers, for bikers.

We've got the state-of-the-art dyno-jet with tuning link—that means a perfect tune for every bike.

CARB & EPA
compliant

"Dr." Jim joined the CycleVisions team in 2008. He brings a wealth of expertise and experience that make him the obvious choice for anyone seriously interested in the Holy Grail of power—more HP, torque AND better gas mileage. Having built automotive race engines for 13 years, Jim then turned his keen eye to Harleys, doing complete machining while in business with his father, where he perfected his craft. He does all the bore and hone, port and polish, valve work, balancing, and custom race engine work himself. And he's not just about the hp and torque but can also increase mpg into the mid 40s. He's built bikes from 100hp to over 200hp and owns bragging rights for building some of the fastest bikes in southern California. He also races A.H.D.R.A. on a modified 97 Dyna® with a 96" ev0 engine putting out 155hp and 148 torque (He runs an impressive 9.23 ET @ 139mph quarter mile).

PRECISION PORTING

In this actual customer chart, max power increased from 68.27 to 113.54*

Torque increased more than 60 percent from 75.85 to 122.14*

Unlike most power enhancing packages, Jim builds motors for each bike individually. By identifying dead spots in stock ports, he can dramatically increase air flow, and thus power and torque. His expertise on the Flow Bench allows him to make adjustments that most mechanics don't see. Don't trust anyone else—call CycleVisions® today.
